

LITTLE DUCK FORGE

product brochure

WELCOME

Welcome to a world where art meets nature. Lucille Scott is an artist and sculptor specialising in creating original designs for the home and garden. She works with steel, copper and glass, using traditional and modern forging techniques, to produce a wide range of bespoke pieces, from architectural ironworks and furniture to decorative sculptures.

Snails

THE FORGE

From her workshop on the south coast, Lucille frequently collaborates with fellow artists such as ceramicists and glass artists whose style aligns with her own. Together, they produce collections designed to stand the test of time, bringing lasting beauty to gardens and outdoor spaces, as well as creating unique accent pieces for interior settings.

Lucille draws inspiration from the delicate shapes and forms of nature as well as her passion for the dynamic, flowing movements of music and dance.

TEAM

Lucille supports young people who show the required artistry and determination to assist in crafting her sculptural pieces. Her talented team includes a welder, Graham, and an apprentice, Martyna. As part of Lucille's programme, they both undertake training with other metal artists, exposing them to a variety of methods and approaches, while broadening their skills.

CREATIVE PROCESS

Every step of the creative process, from design to completion, is executed with meticulous care. From initial sketches, Lucille specialises in transforming the 2D designs into 3D pieces by moving on to the forging process that breathes life into the initial concept. Finally, working with other materials, the sculptures are augmented with vibrant splashes of colour, just as a watercolour artist would create a line and wash painting.

MISSION

Lucille's mission is to provide pieces of superior quality that are affordable, driven by her belief that works of art should be accessible to everyone, not an exclusive privilege. To achieve this, she combines the use of innovative technology with traditional techniques gained from her training as a blacksmith to transform her ideas into high-quality, durable and affordable sculptures.

08

Teasel

Stingray

Lucille's sculptures can be seen at shows across the UK, such as the annual Craft in Focus event at RHS Garden Wisley, as well as in UK galleries and sculpture gardens. Lucille and her work have also been filmed for a TV feature on 'Love your Weekend'.

HOW TO ORDER

If you would like to order one of the Little Duck Forge stock pieces or commission something bespoke, please contact the team at info@littleduckforge.co.uk. You will be guided through the entire process; whether that's browsing current items or discussing ideas for something new. Most items are handmade by at least two artists meaning that, however big or small, all work is entirely unique to you. You will be informed of the expected completion date of your piece, which will vary depending on the scale of work.

PRICING

Our aim at Little Duck Forge is to create pieces of high quality at a fair cost, which is why we only charge for materials and manufacturing time. Some of the most popular pieces start at just £75 with larger sculptures ranging from £350 – £2000. The aim is to cater for different preferences and budgets.

VISIT US

The team welcome visits to Little Duck Forge, to see where it all happens or to meet to discuss a commission, please email for appointments.
